

PNXT_Editor Release

June 19, 2017

PNXT_Editor Release 14.0

Flowserve is pleased to announce the latest release of PNXT_Editor 14.0. Following is a summary of resolutions made in this release:

24451: Added a new dependency - Plug Material - under Price table dependencies and Pricing table.

24758: Added a new dependency - Positioner Housing - under Price table dependencies and Price table.

24476: Added the 'Partlist table update' feature in PNXT_Editor, similar to what is available in P!Nxt application.

24600: Added ColdFlow_141000 on various tabs to enable data entry for this new product.

24371: Made UI changes so that users can view Cv table data for Valdisk TX3 product.

24367: Made UI changes so that users can view Cv table data for Sidewinder trim with Mark One valves.

24373: Added Soft-UHC under Soft seat option to enable Cv table data entry in PNXT_Editor.

24368: Made UI changes for selecting Site1-Site30 while defining alliance agreements under 'MKT1' tab → 'Alliance' tab → 'Alliance Agreement Data' section.

24759: Corrected the logic that enables user to enter Positioner Cv data under 'ENG1' tab → 'Stroke Speed' tab → 'Stroke Speed Calculation Support Data' section.

24608: Made UI changes to display Site code 7 as PQR and Site code 29 as PAS.
